**Instructors:** Fabian Heck, Gregory M. Kobele & Ezer Rasin  
**Time:** Tuesday, 11:15-12:45, SR H1 5.16, Beethovenstraße 15  
**Topic:** Interacting Building Blocks in Phonology, Morphology, and Syntax I: Excitatory and Inhibitory Sequential Interactions  
**Description:** This course is concerned with techniques and effects of ordering rules in phonology, morphology, and syntax, based on concepts like bleeding, feeding, counter-bleeding, counter-feeding, strict cyclicity, strata, extrinsic/parochial ordering, specificity, elsewhere, blocking, phases, and constraints like Merge over Move. A recurrent theme will be the identification of common patterns in phonology, morphology, and syntax.

**IGRA 05**

**Instructor:** Andrew Murphy  
**Time:** Tuesday, 15:15-16:45, SR H1 5.16, Beethovenstraße 15  
**Topic:** Academic Skills for Linguists  
**Description:** The goal of this PhD seminar within the IGRA Graduiertenkolleg will be to equip students with the skills required to conduct top-quality research in linguistics within the international arena. To this end, the course will focus on helping students hone their expertise in (at least) the following areas concerned with the writing, publishing, and presentation of linguistic research:  
1. LaTeX skills: you will be taught the essential skills needed to conduct all your linguistic writing in the LaTeX programming language.  
2. how to write a top-quality linguistic abstract: you will learn how package your theses and arguments in the most interesting and compelling manner within the assigned page limits and other abstract formatting guidelines.  
3. how to write a top-quality (i.e. publishable in a top-tier journal) linguistics paper: what do you include, what do you not include, citation procedures, and most important of all, how do you reason from point A to point B in a clear and logically sound manner.  
4. how to present a linguistics talk or poster at a conference: core presentation skills.  
**Course requirements:** This course is mandatory for all PhD students within IGRA. MA students are also welcome to attend the course. Regular course attendance and participation are expected.  
**Starting date:** April 2, 2019

**IGRA 06**

**Instructor:** Jochen Trommer  
**Time:** Thursday, 09:15-10:45, SR H1 5.16, Beethovenstraße 15  
**Topic:** Topics in Phonology: Iterativity and Directionality of Harmony processes  
**Description:** Iterativity and directionality are the two central differential dimensions for specific harmony processes. A harmony process (vowel or consonant harmony or tone spreading) might spread...
either to targets to the left or to the right or based on dominance relations (directionality) and independently it might affect just a single target or unboundedly many targets (iterativity). In this course we are discussing the crosslinguistic typology of these dimensions (Hyman 2002), different theoretical approaches (e.g. parameter-based as in Archangeli & Pulleyblank 1994, or markedness-based as in Kaplan 2008), computational aspects (Chandlee & Heinz 2018), and the question to which degree they are related to cyclic morphological structure (Bakovič 2000).

**IGRA 07**

**Instructor:** Philipp Weisser  
**Time:** Wednesday, 13:15-14.45, SR H1 5.16, Beethovenstraße 15  
**Topic:** Topics in Morphology: Clitics  
**Description:** In this seminar, we will discuss various properties of the phenomenon of clitics, i.e. morphemes which phonologically depend on the presence of a host but have at least some morphosyntactic properties of an independent word. We will start with classical treatments of clitics (Zwicky 1977, 1985; Miller 1992) and look at approaches with more elaborate classifications (e.g. Klavans 1995, Harris 2002, Anderson 2005). In the second part of the seminar, we will look at a number of different case studies from a wide range of languages. Finally, we will look at what more recent approaches such as Distributed Morphology (e.g. Embick & Noyer 2001, 2007; Kramer 2010) have to say about clitics. Since clitics are often said to be ambiguous as to whether they belong to the morphosyntactic word they attach to or not, they might pose an interesting testing ground to figure out whether the shift from lexical theories towards theories that adopt a uniform combinatorial module for morphology and syntax has been
been successful. Is a framework which does not assume a fundamental distinction between syntax and morphology empirically more adequate to model the properties of clitics? We'll see...

Instructor: Barbara Stiebels
Time: Wednesday, 15:15-16:45, SR H1 5.16, Beethovenstraße 15
Topic: Topics in Morphology: Compounding
Description: Although compounding is a morphologically simple operation, compound structures raise some interesting questions concerning the categorial, morphosyntactic and prosodic status of their constituents, their headedness (exocentric vs. endocentric compounds), their internal structure (including bracketing paradoxes), their interpretation (contrast root vs. synthetic compounds), their patterns of argument inheritance and their delineation from incorporation, derivation, and phrasal structures. We will discuss various theoretical approaches to compound structures and also look at cross-linguistic differences in the distribution and properties of compound structures.

IGRA 08

Instructors: Gereon Müller
Time: Tuesday, 17:15-18:45, SR H1 5.16, Beethovenstraße 15
Topic: Topics in Syntax: Agreement and Concord
Description: The goal of this seminar is to investigate where noun-phrase-internal concord and clause-internal agreement in the world's languages differ, and try to find out to what extent the two phenomena can nevertheless be given identical or similar theoretical accounts. To this end, we will have a look at recent studies of concord, including Baker (2008) (The Syntax of Agreement and Concord), Bayirli (2017) (The Universality of Concord), and Norris (2014) (A Theory of Nominal Concord); and we will also address instances of non-canonical agreement in the clausal domain.
